## Supplementary services and warranty

### Custom chairs

The modular construction of the BMA Axia 24/7 means there are more options than illustrated in this brochure. Examples include wheels, higher/lower gas springs and head supports. In addition to the standard parts there is also an extensive range of custom solutions, if you suffer medical complaints, for instance. For more information and advice on customising, please contact our Customer Service department.

### Upholstery

We offer you an extensive collection of 24/7 materials and leather. All these materials are easy to clean, dirt-repellent and hard-wearing. You must of course follow the maintenance recommendations to ensure a long life span. A selection from our range:

Extra hard-wearing materials, such as Staccato by Victor Innovatex (1,500,000 rubs) or Climatex Ultra (with over 500,000 Martindale rubs).

Top-grade (artificial) leather with a fine, even textured structure and a strong finish. The (artificial) leather feels soft and comfortable and is very easy to maintain. Both the artificial leather and the natural leather comply with the DIN ISO EN 5402 standard and can resist 20,000 Flexometer movements.

You can of course opt for a combination of fabric/leather for your chair.

We also offer you the option of giving your chair an upholstery and appearance according to your specific wishes. In addition to embroidering your corporate logo on your chair and/or headrest, and using your own material, you may also select stitching in a contrasting colour. In the colour of your house style, for example. Contact our Customer Service department for more information.

### 3-year comprehensive warranty and residual-value guarantee

We provide a comprehensive 3-year warranty on 24-hour use on all BMA Axia 24/7 chairs. If anything needs replacing within three years, we do not charge transport, material or labour costs\*. With BMA's residual value guarantee scheme, your chair is still worth something at the end of its economic life span! We'll happily take your old, used 24-hour chair back.

\* ask for the conditions

## Work Healthy – Sit Smart

At BMA Ergonomics, we combine our knowledge and expertise in the field of ergonomics and biomechanics with technology and sustainability. We study the constantly changing workplace and understand the wishes and requirements of the individual office worker and users of 24/7 chairs. An Axia with Smart Active Technology makes users more aware of their posture and provides active support. It is our mission to improve the posture of office workers and to ensure that everyone learns to adopt a healthier way of working.

## Inspire great work

Flokk is the market leader in the design, development and production of workplace furniture in Europe. We are the proud owner of product brands HÅG, RH, Giroflex, BMA, Offecct, RBM, Profim and Malmstolen. About 2.500 employees work together to realize the vision of our company: Inspire great work.

Our head office is in Oslo, Norway. We have production units in Røros (Norway); in Zwolle (the Netherlands); in Koblenz (Switzerland), in Turek (Poland) and in Tibro, Nässjö and Hunnebostrand (Sweden). In addition, we keep sales offices in Norway, Sweden, Denmark, Germany, Belgium, the Netherlands, UK, France, Switzerland, Singapore, USA, China and Australia. Flokk products are sold in more than 50 countries.
